

EZLive Mobile Surveillance App

Overview

EZLive is a mobile surveillance app intended for small businesses. You can use this app to connect to Uniview devices through network and view live or recorded video, control PTZ cameras, receive alarm notifications, share devices, manage files and have two-way audio on a mobile phone. This app is ideal for scenarios such as kindergartens, restaurants, stores, etc.

Features

- Add devices: Supports quick adding by QR code scanning and allows adding devices without signup for a cloud account.
- Allows multiple users to view the same video contents simultaneously through device sharing or by logging in to the same account from multiple clients.
- Rich features:

Live view: Multi-window display, PTZ control, two-way audio, multiple options of image quality, snapshot, local recording, and corridor mode.

Playback: Recording search, synchronous playback, smart playback, split search, playback of recordings saved on an SD card.

Alarm: User can receive real-time alarms and view alarm-related recordings.

Remote configuration: User can configure devices on their mobile phone, including time, illumination, motion detection, human body

detection, automatic tracking, alarm sound, and recording schedule.

Device management: User can share devices, cancel sharing, and transfer devices.

Cloud account management: Allows user to sign up using mobile phone number/email, edit account information, retrieve password, cancel accounts.

File management: Allows user to sort files by type (image/video), export to album, share through third-party applications.

Device maintenance: User can upgrade device by cloud, export diagnostic information, test network speed.

Specifications

Function	Description		
Device Management			
	Max. 6 devices or 100 channels.		
	Supports IPC, NVR, video doorbell.		
	Demo devices are provided for trial.		
	User can add a device by scanning QR code or inputting register code.		
Device management	User can add devices without signup for a cloud account.		
	User can edit and delete devices.		
	User can share and transfer devices.		
	User can upgrade devices/channels by cloud, export diagnostic information, and test network speed.		
Live View			
	1/4/6/9/12/16 image display.		
	Multi-screen display.		
	Multiple image quality options: HD/SD/Smooth (main/sub/third stream).		
	Corridor mode.		
Play control	Digital zoom.		
	Play/pause video in the selected window.		
	One tap to start playback in the selected window.		
	Snapshots and videos can be saved to the mobile phone and can be viewed by one tap of the button.		
	8 directions.		
PTZ control	Focus, zoom.		
	Note: Actual functionality may vary depending on device capability.		
Two-way audio	Two-way audio with an IPC (including the directly connected IPC and the NVR-connected IPC).		
	Note: Actual functionality may vary depending on device capability.		
Recording & Playback			
	Supports recording search by time and device.		
Recording search	Shows search results on the calendar.		
	Allows user to adjust the video start time.		

User can drag the timeline to search video, pinch on the timeline to zoom in or out (5/10/30/60 minute scales). User can drag the timeline to search video, pinch on the timeline to zoom in or out (5/10/30/60 minute scales). Allows user to narrow down the search and quickly find the interesting content by splitting a video into 4 or 9 segments. Supports smart playback. Can play recordings saved on an SD card. Recording Playback Supports digital zoom. Snapshots and videos can be saved to the mobile phone and can be viewed by one tap of the button. 1/4x, 1/2x, 1x, 2x, 4x playback speeds. Note: IPCs that are directly added to the app only support 1x, 2x, 4x. Lear can close/resume multiple videos at a time. Cloud account management Supports signup with mobile phone number (China) or email address (outside China). Allows user to claim in mobile phone number (China) or an email address (outside China). Allows user to change the password and personal information. Allows user to change the mobile phone number or email address used for signup. Allows user to change the mobile phone number or email address used for signup. Allows user to change the mobile phone number or email address used for signup. Allows user to change the mobile phone number or email address used for signup. Allows user to change the mobile phone number or email address used for signup. Sharing configuration User can share devices and channels. User can stare devices and channels. User can edit sharing settings and cancel sharing. Alarm Message User can view the history of sharing. User can view the history of sharing. User can edit sharing settings and cancel sharing. Alarm fist Note: This functionality is not applicable to certain alarm types. Supports pushing alarms of cloud devices in real time. Remote Configuration User can configure motion detection, human body detection, alarm sound, automatic tracking on the mobile phone. User can configure recording schedule, storage policy, and SD card on the mobile phone.		Allows user to switch image quality.		
Allows user to narrow down the search and quickly find the interesting content by splitting a video into 4 or 9 segments. Supports smart playback. Can play recordings saved on an SD card.
